

AX™ Gateway delivers intuitive web access within the AuditExchange™ repository

Leveraging a centralized working environment, AX Gateway provides audit with an intuitive web interface that incorporates advanced integration with Microsoft Office® productivity tools. Audit teams can now focus on value-based audits by reviewing relevant audit content, running analytics and uploading supporting documentation without requiring any existing ACL™ Desktop experience.

Key Benefits

Point & Click Web Interface

Through the simplicity of a web browser, all audit team members including those with no ACL Desktop experience can efficiently document, collaborate, and review analytic results or perform secondary analysis with Microsoft Excel. By leveraging a centralized secure audit environment, your audit team now has access to safe-guarded sensitive data and virtually limitless analytic processing power, which is all accessible via an intuitive web interface.

Advanced Integration with Microsoft Office

Take advantage of add-ins for Microsoft Outlook®, Word, Excel®, PowerPoint®, Visio®, and Project to allow audit teams to leverage existing productivity tools to directly open, edit, save and link to content within the AuditExchange repository. Increase your overall audit efficiency by building on existing team proficiencies and synergies with the tools they already know and use.

Increase Automation

Ensure your audit teams stay focused on the tasks at hand. Simplified access to the right data at the right time reduces technology learning curves, leverages automated analysis and provides meaningful results when it counts.

AX Gateway enables organizations to:

- Use a web-based interface to access the AuditExchange repository and engage the broader audit team to participate in running analytics.
- Provide secure web-based access to sensitive data.
- Use Microsoft Excel to perform secondary analysis, share and present results.
- Use Microsoft Office® add-ins (Excel, Word, PowerPoint, Outlook, Visio, Project) to add to and interact with the repository.
- Leverage automated procedures and processes to focus on more value-based audits.

The screenshot shows the AX Gateway web-based interface. The top navigation bar includes 'GW AX | Gateway', 'Working', 'Recent Work', 'Help', and 'Log Out'. A search bar is visible on the right. The main content area displays a hierarchical view of audit data under '2008 Purchase to Payment' > 'Q1' > 'Files' > 'Analytics' > 'Data'. A table lists the following data:

Name	Record Count	File Size (KB)	Last Modified By	Last Modified
Analyzing_Data	102	6018	DevTest2 (ACL\DevTest2)	2/8/11 5:01 PM
Final_Results	102	6018	DevTest2 (ACL\DevTest2)	2/8/11 5:01 PM
Gathering_Data	102	6018	DevTest2 (ACL\DevTest2)	2/8/11 5:01 PM
Reconciling_Data	102	6018	DevTest2 (ACL\DevTest2)	2/8/11 5:01 PM

The AX Gateway web-based interface

Location	Type	Name	Last Modified By	Last Modified
2008 Purchase to Payment/Q1	Data	Reconciling_Data	DevTest2 (ACL\DevTest2)	2/8/11 5:01 PM
2008 Purchase to Payment/Q1	Data	Final_Results	DevTest2 (ACL\DevTest2)	2/8/11 5:01 PM
2008 Purchase to Payment/Q1	Data	Analyzing_Data	DevTest2 (ACL\DevTest2)	2/8/11 5:01 PM
2008 Purchase to Payment/Q1	Data	Gathering_Data	DevTest2 (ACL\DevTest2)	2/8/11 5:01 PM
2008 Purchase to Payment/Q1	Analytics	Analytic2	DevTest2 (ACL\DevTest2)	2/8/11 5:01 PM
2008 Purchase to Payment/Q1	Analytics	Analytic3	DevTest2 (ACL\DevTest2)	2/8/11 5:01 PM
2008 Purchase to Payment/Q1	Analytics	Analytic1	DevTest2 (ACL\DevTest2)	2/8/11 5:01 PM
