

At ACL, we believe that the future of the audit and compliance professions relies on the quality of education and training students receive at universities and colleges. ACL is committed to supporting the academic community with leading technology solutions to meet the changing needs and demands of today's audit and compliance professionals.

The ACL Education Futures Program is intended to support educators in higher learning institutions in teaching the concepts and effective use of data analysis software in accounting, auditing and finance disciplines. As part of the Education Futures Program, ACL donates software, support services for instructors, and educational materials—valued to USD 200,000—to institutions approved for program participation. There are no costs associated with participation in the Education Futures Program.

Educator's Kit

The following ACL products and services are included with program membership:

- » *ACL*™ Desktop Edition (Education version - 100KB data processing limit)
 - one copy for educator's use only
- » *ACL*™ Network Edition (Education version - 100KB data processing limit)
 - for up to 99 students
- » Premium Support – for educator's use only
- » Upgrades (as available) as long as program membership is maintained
- » *ACL* electronic manual

Additional Educator Resources

ACL Training (for educator's use only)

To ensure that educators are able to maximize their use of *ACL* software in the classroom, educators are eligible for a 50% discount off the price of the regular open enrollment training offered by ACL and its global channel network.

ACL Materials & Academic Textbooks

Educators are also welcome to download and distribute ACL customer case studies, white papers, and industry application sheets to complement course materials.

Several publishers around the world have developed academic textbooks that discuss (and are sometimes bundled with) *ACL* for student use. A current list is available at www.acl.com/textbooks

To Apply

The ACL Education Futures Program is open to all accredited degree-granting colleges and universities providing undergraduate or graduate level studies. An eligible educator is an instructor or professor teaching a course where the use of data analysis comprises a significant or important part of the course instruction. ACL will evaluate each application and inform applicants of their eligibility within a few weeks.
