### Focus and Features

Custom training is an effective way to leverage your software investment for fast payback. This two-day course supports the implementation of AuditExchange (AX) in your organization and is built around your data analysis requirements using your own data. The focus is to develop and document *ACL*<sup>™</sup> procedures specific to your needs while ensuring the necessary skills are reinforced within your team.

You will be provided with a framework for maximizing the effectiveness and efficiency of using AX. You will immediately begin applying what you learned to your organization's data. The course will be led by an ACL Certified trainer with experience in applying *ACL* best practices to audit requirements.

This course is often paired with *AX 302: Developing Analytics for AuditExchange* to apply the lessons learned immediately to your organization's data and audit challenges.

### Learning Objectives

By the end of this course, you will be able to:

- Apply best practices in AuditExchange usage across your audit or assurance processes
- Develop *ACL*-based procedures to support the achievement of your organization's audit and assurance objectives
- Design and deploy *ACL* procedures to increase your team's effectiveness and efficiency

### Who Should Participate
